EDUCATION

KONKUK UNIVERSITY (KU), SEOUL, REPUBLIC OF KOREA

Doctor of Philosophy, Smart Vehicle Engineering (2022 – 2026)

- GPA: **4.0/4.0**
- Dissertation: *Scaling-Based Design Approach for Tailbeat Fish-Inspired Robots Swimming at High Speed and Propulsive Efficiency.*

Master of Science, Smart Vehicle Engineering (2019 – 2021)

- GPA: **3.9/4.0**
- Dissertation: *Investigation of stability and aerodynamic performance of a flapping-wing micro air vehicle in hover using 3D computational fluid dynamics (CFD) analyses.*

VIETNAM NATIONAL UNIVERSITY, HCM CITY UNIVERSITY OF TECHNOLOGY (VNU-HCMUT), HCM, VIETNAM

Bachelor of Engineering, Mechanical and Aerospace Engineering (2013 – 2018)

- GPA: **3.2/4.0**
- Dissertation: *Computational Approach on the Aerodynamics of UAV combining fixed wing and three propellers.* (Grade: **9.1/10**)
- The most prestigious and talented 5-year Frech – Vietnamese Training Program for Excellent Engineers (PFIEV) is accredited by France's Engineering Degree Commission (2004 – 2022) and designated as a EUR – ACE Master Program by the European Network for Accreditation of Engineering Education (ENAE, 2010 – 2022).
- This program offers a high-quality engineering education, comprising 274 European Credits (ECTS).

RESEARCH EXPERIENCE

PH.D. PROGRAM, KU, SEOUL, REPUBLIC OF KOREA

Project-2024: Flapping-Wing Micro Air Vehicle (FW-MAV) in Fast Forward Flight

Joint research with Prof. Dario Floreano's lab, EPFL, Switzerland

01 co-first author journal paper (in progress)

- Processed the measured wing kinematics of the FW robot under tethered condition with a tilting stroke plane, using a desk-sized wind generator providing a speed of 4.3 m/s.
- Achieved good agreement between simulation and experimental measurements.

Project-2022: Development of Biomimetic Underwater Robot Platform

01 first-authored journal paper (submitted to *Ocean Engineering*, under third-round peer review)

- Developed a tailbeat robotic fish that can achieve a target speed of 1.79 m/s (5.5 body lengths per second) with a low cost of transport using a scaling-based design approach.
- Developed a larger-scale model aiming for faster speed and higher-payload capability.
- Conducted simulation to study hydrodynamic force production and vortex formation during free swimming using measured undulatory kinematics.

Project-2021: Toward Flapping Flights on Mars

01 first-authored journal (2024) & **01** co-authored journal (submitted to *Acta Astronautica*; currently under first review)

- Investigated stability characteristics of a FW hovering on Mars using CFD simulations.
- Analyzed aerodynamics of a flapper during takeoff under ultra-low air densities by CFD.

Project-2020: Leaping Robotic Fish

01 first-authored & **01** co-authored journal publications (2023)

- Analyzed the feasibility of gliding in a flying-fish-like robot after water exit using CFD.
- Estimated body drag through CFD analyses and measured undulatory kinematics.

M.S. PROGRAM, KU, SEOUL, REPUBLIC OF KOREA

Project-2020: Aerodynamic improvement of a hovering FW-MAV

01 first-authored journal (2021)

- Proposed optimal wing kinematics that improved aerodynamic efficiency by 31%.
- Analysis included spanwise corrugation, adjusted wing rotation angles, and exclusion of clap-fling mechanism.

Project-2019: Comparative stability analyses of FW-MAVs

01 first-authored journal (2021)

Compared the longitudinal and lateral stability characteristics of two flappers using CFD.

GRADUATE RESEARCH, VNU – HCMUT, HO CHI MINH, VIETNAM (VN)

Project-2018: Aerodynamics of UAV–HOPE: Fixed Wings in Forward Flight

01 co-authored journal (2024); Main contributor: Original draft, editing, review, and revisions

- Investigated the aerodynamics of fixed wings during forward flight using OpenFOAM.
- Analyzed laminar purple separation along chordwise and spanwise positions.

Project-2018: Aerodynamics of UAV–HOPE: Tricopter Frame in Forward Flight

01 co-authored journal (2020)

- Co-advised tricopter aerodynamics study using Virtual Blade Method in OpenFOAM.
- Iteratively predicted the tip-path-plane angle during forward flight using MATLAB, based on CFD-derived aerodynamic force coefficients.

B.E. PROGRAM, VNU – HCMUT, HO CHI MINH, VIETNAM

Thesis-2018: Aerodynamics of UAV–HOPE: Tricopter Frame During Takeoff

01 international conference paper at Southeast Asia Workshop on Aerospace Engineering (2018).

- Analyzed aerodynamics of a tricopter during takeoff using the Virtual Blade Method in OpenFOAM.

AWARDS AND FELLOWSHIP

- Excellent Dissertation Award, Bioengineering Division, Korean Society of Mechanical Engineers — Awarded as one of the top five Ph.D. dissertations nationwide (2026)
- Brain Korea 21 Scholarship, Korean Government Program Supporting Outstanding Scholars (**≈ \$23,000**, 2026)
- Postdoctoral Fellowship, KU, Korea (**≈ \$33,000**, 2026)
- Academic Award, College of Engineering, KU — Awarded for Best Ph.D. Research Achievement (2026)
- Best Paper Award, Korea Society for Aeronautical and Space Sciences Conference (2024) & International Conference on Intelligent Unmanned Systems (2022 & 2025)
- Ph.D. Fellowship, KU (**≈ \$78,000**, 2022 – 2026)
- Research Assistant Fellowship, HCMUT (**≈ \$1,200**, 2018) and KU (**≈ \$22,000**, 2019 – 2021)
- Merit-based Scholarship, KU (50% Tuition **≈ \$21,000**, 2019 – 2024)
- Teaching Assistant Fellowship, HCMUT (**≈ \$100**, 2018) and KU (**≈ \$10,000**, 2024)
- Excellent Student of HCMUT (150% Tuition **≈ \$250**, 2018)
- Quintessential Student of HCMUT (125% Tuition **≈ \$350**, 2014 & 2017)
- **Top 1%** Nationwide; Qualification for the PFIEV Program; Honor Cup for Quintessential Students and 1st Place in the Honors Science Program, Tran Phu High School – National University Entrance Exam (Score: **25/30**, 2013)

PROFESIONAL SERVICES

- **Journal referee:** Journal of Fluids and Structures, Chinese Journal of Aeronautics, Bioinspiration & Biomimetics, Engineering Research Express, Journal of Aeronautics Astronautics and Aviation, International Journal of Intelligent Unmanned Systems.

ACADEMIC SERVICE AND MENTORSHIP

Assessment & Teaching Assistant

- Grading Assistant: Basics of Mechanics (KU); Finite Element Method (KU); Fluid Mechanics (HCMUT).
- Thesis Evaluator: Graduation theses of Bachelor's students (HCMUT, 2026)

Research & Mentorship Assistant

- Co-supervisor: Undergraduate research and capstone projects, Dr. Thi Hong Hieu Le's Lab, HCMUT (2025-present).
- Mentor: Master's students in CFD simulations and mechanical design, Dr. Taesam Kang's Lab, KU (2024).
- Advisor: Undergraduate capstone projects, Dr. Thi Hong Hieu Le's Lab, HCMUT (2018).

TECHNICAL SKILLS

- Programming Languages: MATLAB, C.
- Development Tools: Visual Studio, VS Code.
- Meshing Generators: ANSYS-ICEM, Salome, snappyHexMesh.
- Simulation and Post-Processing Tools: ANSYS-Fluent, CFD-Post, OpenFOAM, ParaFoam.
- Tools: CNC & 3D Printing Machines, Direct Linear Transformation Digitizing Tool.
- Software: AutoCAD, Adobe Photoshop, Cubicreator, MS Office, SolidWorks.
- Processes: Silicone Mold Making, Transducer Measurement, Image Processing.

JOURNAL ARTICLES

1. **Nguyen K**, Park HC. Scaling-Based Design Approach for Tailbeat Fish-Inspired Robots Swimming at High Speed and Propulsive Efficiency. *Submitted to Ocean Engineering, September 2025; under third-round peer review.*
2. Ha G, **Nguyen K**, Yu J, Kang T, Park HC. Can flapping wings keep lift coefficient unchanged at takeoff under extremely low air density? *Submitted to Acta Astronautica, March 2026; under second-round peer review.*

3. Le THH, **Nguyen K**, Vuong THN. Numerical analysis for aerodynamic characteristics of the unmanned aerial vehicle (UAV) in forward flight. J. Aeronaut. Astronaut. Aviat. 1081 **2024**.
(JCR 2024, Q3, IF = 1.1, Rank: 40/55 in Eng., Aerospace, Main contributor: drafting, editing, review, & revisions)
4. **Nguyen K**, Ha G, Kang T, Park HC. Analysis of hovering flight stability of an insect-like flapping-wing robot in Martian condition. Aerosp. Sci. Technol. 152 109371 **2024**. ([Link](#))
(JCR 2024, Q1, IF = 5.8, Rank: 6/55, Top 11% in Eng., Aerospace)
5. **Nguyen K**, Park HC, Feasibility study on mimicking the tail-beating supported gliding flight of flying fish. Ocean Eng. 287 115745 **2023**. ([Link](#))
(JCR 2023, Q1, IF = 4.6, Rank: 2/25, Top 8% in Eng., Marine, Rank: 4/65, 6% in Eng., Oceanography)
6. Pham TH, **Nguyen K**, Park HC. A robotic fish capable of fast underwater swimming and water leaping with high Froude number. Ocean Eng. 268 113512 **2023**. ([Link](#))
(JCR 2023, Q1, IF = 4.6, Rank: 2/25, Top 8% in Eng., Marine, Rank: 4/65, 6% in Eng., Oceanography)
7. **Nguyen K**, Au LTK, Phan HV, Park HC. Comparative dynamic flight stability of insect-inspired flapping-wing micro air vehicles in hover: Longitudinal and lateral motions. Aerosp. Sci. Technol. 119 107085 **2021**. ([Link](#))
(JCR 2021, Q1, IF = 5.5, Rank: 2/34, Top 6% in Eng., Aerospace)
8. **Nguyen K** et al. Effects of wing kinematics, corrugation, and clap-and-fling on aerodynamic efficiency of a hovering insect-inspired flapping-wing micro air vehicle. Aerosp. Sci. Technol. **2021**. ([Link](#))
(JCR 2021, Q1, IF = 5.5, Rank: 2/34, Top 6% in Eng., Aerospace)
9. Tran DKK, **Nguyen K**, Le THH, Nguyen NH. Numerical simulation for the forward flight of the tri-copter using virtual blade model. J. Adv. Res. Fluid Mech. Therm. Sci. 67 1 1-32 **2020**. (SJQR Q3, IF = 0.3)

CONFERENCE PAPERS

1. **Nguyen K**, Ha G, Park HC, Design and fabrication of high-thrust tail-beating mechanism for fish-inspired swimming robot, ICIUS, Indonesia, 2025. (*Presenter & Best paper award*).
2. Ha G, **Nguyen K**, Park HC, A study on the takeoff of an insect-like flapping-wing system under low air density and low gravity conditions, Proceedings of KSAS, Korea, 2024. (*Best paper award*).
3. **Nguyen K**, Ha G, Park HC, Design and fabrication of high-thrust tail-beating mechanism for fish-inspired swimming robot, ICIUS, Indonesia, 2024. (*Presenter*)
4. **Nguyen K**, Park HC, Analytical and experimental performance verifications of a fast-swimming robotic fish, ICIUS, Indonesia, 2024. (*Presenter*)
5. **Nguyen K**, Kang, TS, Park HC, Hovering characteristics of an insect-like flapping-wing robot on Mars, Proceedings of KSAS, Korea, 2023. (*Presenter*)
6. **Nguyen K**, Ha G, Park HC, Preliminary design of a fish-like fast robot by scaling of the KUFish, ICIUS, AU, 2023.
7. **Nguyen K**, Park HC, Roles of hydrodynamic forces generated by tail-beating motion in gliding flight of flying-fish-mimicking robot, ICIUS, Adelaide, Australia, 2023. (*Presenter*)
8. **Nguyen K**, Pham TH, Park HC, Numerical investigation of hydrodynamics for a fish-like robot under undulatory forward swimming, Proceedings of the Korean Society of Mechanical Engineers Annual Meeting, Jeju, Korea, 2022. (*Presenter*)
9. Pham TH, **Nguyen K**, Park HC, Leaping out of water of the KUFish: Prediction and demonstration, ICIUS, Japan, 2022. (*Best paper award*).
10. **Nguyen K**, Pham TH, Park HC, Numerical estimation of hydrodynamic thrust using the measured tail-beating kinematics of a fish-like robot, ICIUS, Japan, 2022. (*Presenter*)
11. **Nguyen K**, Au LTK, Phan HV, Park HC, Wing kinematics modulation in an insect-like tailless flapping wing micro air vehicle (FW-MAV) for higher aerodynamic efficiency, ICIUS, Vietnam, 2021. (*Presenter*)
12. **Nguyen K**, Au LTK, Park HC, Three-dimensional wing kinematics for improved aerodynamic performance of insect-like flapping-wing micro air vehicle, Proceedings of KSAS, Korea, 2020. (*Presenter*)
13. Au LTK, **Nguyen K**, Park SH, Park HC, Effect of wing corrugation on aerodynamic performance in 3D flapping wings, Proceedings of KSAS, Korea, 2019. (*Presenter*)
14. Tran, DKK, **Nguyen K**, Le THH, Numerical simulation for the forward flight of the tri-copter using Virtual Blade Model, SAWAE, Malaysia, 2019.
15. **Nguyen K**, Nguyen NH, Le THH, Numerical approach for the vertical take-off and landing UAVs using the virtual blade model, SAWAE, Thailand, 2018. (*Presenter*)
